

### Accessories

Project: Crucible Theatre, Sheffield

“ Gradus aluminium stair edgings have been installed at the Crucible Theatre in Sheffield, helping to create a safe and stylish environment for visitors to the renowned entertainment venue. ”

Lynette Bowden  
Marketing Manager

The stair edgings were installed on the staircases in the reception area and main auditorium, which has now been awarded Grade II listed status.

Designed to reduce the risk of trip and slip accidents on staircases, the double channel profile was used to increase the surface area of the slip-resistant material, whilst also providing a stair edging durable enough for use in heavily pedestrianised areas.

Snowdrift inserts were used to define the step edge by providing a suitable colour contrast with the carpet, in line with BS8300:2009+A1:2010 and Approved Document M of The Building Regulations 2000.

Suitable for use in interior and exterior environments and available in a choice of options, the CT range has profile designs available to accommodate most stair shapes.
