PROJECT:
EVERYMAN CINEMA,
BELSIZE PARK, LONDON

Continuity Step Lighting and Seat Row Indicators

Gradus lighting systems

Products Installed:

- RNT1218L PVC-u stair edgings with Continuity fibre optic rod, colour White
- Standard interior insert, colour Snowdrift
- Aluminium seat row indicator

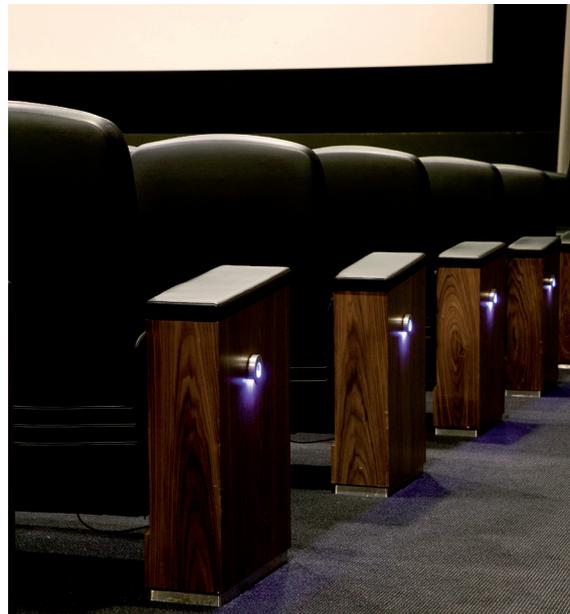

Application:

Gradus Lighting supplied and fitted Continuity step lighting and seat row indicators into the exclusive, one screen cinema, as part of the Everyman cinema's renovation.

The RNT1218L Continuity stair edgings were installed into the luxury cinema, reducing slips and trips by helping the customers to identify a change in level. The illuminated step edge is also invaluable to the staff when conducting their 'at seat service' in the dark cinema conditions. Standard interior insert in Snowdrift creates 30 LRV points difference with the dark floor covering, further defining the step edge.

The aluminium seat row indicators, installed into the aisle chairs, also help customers to easily find and navigate to their seats.

Gradus Lighting way finding systems assist cinemas in creating safe and accessible environments for all, in line with BS8300:2009+A1:2010, Approved Document M and the Equality Act 2010.
