PROJECT:
MEDICINEMA,
ROYAL VICTORIA INFIRMARY, NEWCASTLE

Decorflex & RNT718L Interlok Advance Step Lighting

Gradus lighting systems

Products Installed:

- RNT718L transparent PVC-u stair edging profile with Interlok Advance, colour green
- Standard interior insert, colour Snowdrift
- Decorflex, colour blue
- Aisle lighting, colour green

Application:

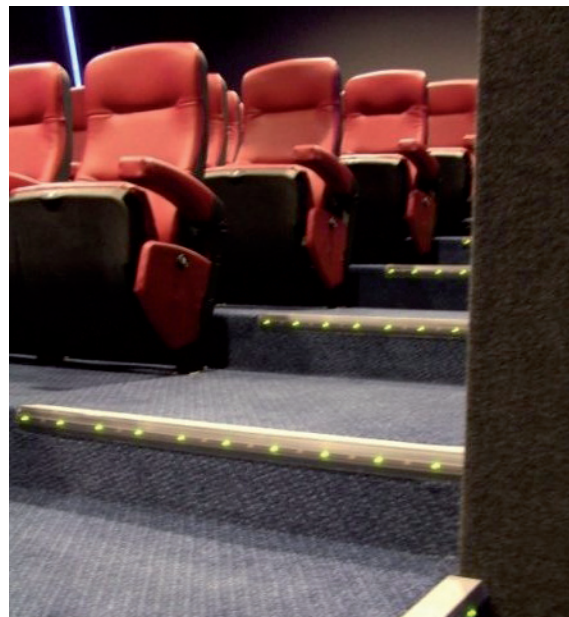

Gradus Lighting supplied and fitted free of charge Interlok Advance step lighting, Aisle lighting and Decorflex into the MediCinema at the Royal Victoria Infirmary. MediCinema is a registered charity that has formed a unique partnership with the health sector and the film industry, installing state-of-the-art cinemas in hospitals around the UK.

The RNT718L Interlok Advance stair edgings were installed into the cinema to help prevent trips by identifying changes in level to patients and hospital staff.

The insert colour chosen helps to define the step edge by providing a suitable colour contrast with the carpet, in line with BS8300:2009+A1:2010 and Approved Document M of the Building Regulations 2000.

In addition Aisle Lighting was installed to highlight the entrance and exit route and aid wayfinding. Decorflex was installed onto the walls of the cinema creating a dramatic wall feature whilst avoiding glare on the screen.

Christine Hill, Chief Executive of MediCinema says, "We cannot thank Gradus enough for so generously donating the lighting for the MediCinema auditorium at the Royal Victoria Infirmary in Newcastle. Their lighting has helped create the magic that is cinema for the patients of the RVI so that even those in beds and wheelchairs can experience the all-encompassing environment of a cinema".
