Project: Viables Business Park

Commercial

“ Esplanade 8000 is an incredibly durable matting system ideal for commercial applications like Viables Business Park, where a heavy duty solution is required. In addition it can be manufactured to most shapes and sizes as well as being available on the Gradus five-day manufacturing service.”

Karen Burman
Product Manager

Gradus Esplanade 8000 primary barrier matting has been installed in the main reception area at Viables Business Park.

The matting significantly reduces the amount of dirt and moisture being tracked into the building, helping to minimise the risk of 'slip accidents' caused by wet flooring. By removing dirt at the point of entry to the building, Esplanade 8000 primary barrier matting helps to enhance the appearance of the entrance, and protect adjacent floorcoverings, making it a particularly cost effective way of reducing long-term cleaning and maintenance costs.

Esplanade 8000 is available in either open or closed construction and in two thicknesses (12mm or 18mm).

Product Specified:

- Product Range: [Esplanade 8000](#) Primary Barrier Matting
- Wiper Colour: Orca
