

Why use barrier matting?

✓ Increase public safety

According to the Health & Safety Executive, 90% of slip accidents in public buildings occur on wet floors.

An effective matting system can reduce the amount of dirt and moisture tracked into a building by up to 90%, helping to reduce such slip accidents.

✓ Remove dirt & moisture

More than 70% of dirt and moisture in buildings is tracked in by pedestrian and wheeled traffic.

An effective matting system removes and retains dirt and moisture, improving the appearance of internal floorcoverings and preventing unnecessary replacements.

✓ Reduce maintenance costs

On-going cleaning & maintenance is the largest cost in the lifecycle of any floorcovering. An effective entrance mat will reduce the amount of dirt that is tracked into a building therefore reducing maintenance costs, a buildings operational carbon and increase the life of a building's floorcoverings.

Follow our 3 step guide to selecting the correct barrier matting, see pages 15-17
