PROJECT:  
REEL CINEMA,  
CREWE

## Gradus lighting systems

### Client Brief:

To create lighting effects that complemented the contemporary build of the cinema, in the foyer, café bar, concessionary areas, washrooms and auditoria.

Full project management by Gradus Lighting, from source and manufacture of all fittings, through to installation.

**Foyer, Café Bar & Concessionary Areas** - Specialist effect LED lighting and cold cathode lighting in various colours were utilised to highlight features such as advertising displays and architectural ceiling features without creating glare.

**Washrooms** - Clean, fresh lighting was created in the washroom areas, where fittings were concealed to provide adequate functional lighting whilst maintaining the contemporary theme of the building.

**Auditoria** - In addition to standard step & aisle LED lighting, Gradus created specialist lighting effects within the acoustic wall treatments to create dramatic wall features, whilst avoiding glare on the screens.

These images are representative of the lighting effects that can be created by Gradus Lighting.
