PROJECT:  
VUE CINEMA 02 DOME,  
LONDON

## Gradus lighting systems

### Client Brief:

To devise and install a bespoke lighting scheme to enhance the customers' cinema 'experience'. In addition, cinemagoers needed to be safely guided through the new, state-of-the-art 11 screen cinema complex.

Gradus worked closely with Vue Cinema's project management team to fit all 11 screens with low voltage LED step and aisle lighting and alphabetical row indicators to aid wayfinding.

In addition, the VIP screen, London's biggest cinema auditorium, was fitted with Gradus' innovative Decorflex lighting to create both a soft, dimmable halo around the screen and dramatic lighting effects in three runs across the walls and ceiling.

Similar special effects were then created using Decorflex in the cinema's two foyer areas to continue the contemporary theme throughout the cinema complex.
