Gradus Floorcoverings is a brand of the Gerflor Group and is a UK manufacturer of premium quality carpet tile and plank, broadloom and impervious backed carpets which excel in terms of functionality, aesthetics and ease of maintenance.

Utilising a range of high performance yarns, Gradus' extensive range of carpets are suitable for a wide variety of contract applications including commercial office, healthcare and education environments.

In addition, we also offer a range of looselay luxury vinyl tile from the Creation 55 range that complements our carpet tile offer.

ECONYL®
ENDLESS POSSIBILITIES

ECONYL® Regenerated Solution Dyed Nylon is produced using nylon waste which is recovered from oceans and from landfill. Waste such as fishing nets, fabric scraps, carpet and industrial plastic is recovered, sorted and cleaned. Through a regeneration and purification process, the nylon waste is recycled back into its original purity.

ECONYL® Regenerated Solution Dyed Nylon is processed into carpet yarn and used to manufacture several of our carpet tile ranges and barrier matting ranges.

DESIGN YOUR SPACE

Create a floor scheme

Explore the versatility of modular design, zoning and feature areas to create a unique floor scheme.

Choose the right product

Use the zonal performance chart to choose the right product for the right area.

Floor plan examples

Take inspiration from the floor plan examples to create a coordinated floor scheme.

Floorcoverings Collection

Choose from a selection of premium and high performance contractor floorcoverings including a wide range of carpets in tile, plank, broadloom and impervious formats and complementary looselay luxury vinyl tile designs.

CREATE A FLOOR SCHEME

Explore the versatility of modular design, zoning and feature areas to create a unique floor scheme.

MODULAR DESIGN

Consider the versatility of tile and plank in both carpet and looselay LVT and choose from a range of different installation methods. Mix complementary tones together on the floor to create a unique floor design.

ZONING

Define spaces such as walkways and desk areas by combining different tones to create a gradual transition across the floor from one zone to another.

FEATURE AREAS

Combine colour contrast and use bright accent colours and bold installation methods to create a feature area or an exciting design statement.

CHOOSE THE RIGHT PRODUCT

Use the zonal performance chart to choose the right product for the right area.

BRE Global (BREEAM):

Adventurer achieves either A+ or A across all BREEAM defined building applications against which it has been assessed.
For specific ratings visit: www.greenbooklive.com

The Dementia Services Development Centre at the University of Stirling have undertaken a review of the Carezone range and have rated its design in relation to dementia design principles and its usability within a dementia-inclusive environment.

All Carezone colours are rated as Class 1a and are suitable for use in dementia applications. For an environment to be considered 'dementia-inclusive' careful consideration must be given to the specification of adjacent finishes with a maximum contrast of 10 points LRV between adjacent floor surfaces.

Dry adhesive mesh for peelable carpet fixing

Fully releasable environmentally friendly installation system for commercial use.

- Totally recyclable
- Quick, easy and clean installation and removal
- No odours or VOC problems, which are commonly associated with wet adhesives
- Ideal for both broadloom and carpet tile installations
- Installs and performs over virtually any surface, including carpet, concrete and vinyl
- Permits instant re-use of the floor
- Pressure sensitive bond becomes stronger in use
- Highly resistant to rolling loads
- Dry bond adhesive mesh creates total edge to edge adhesion between carpet and sub surface

Lok-Lift permits carpet to be laid on many existing floor finishes saving costs and time, whilst avoiding mess and disruption.
