

Cleaning and Maintenance Information

PVC Capping Seals

Data Sheet: Page 1 of 1 DCL/21.06.24

These cleaning and maintenance guidelines apply to the following Gradus profiles:

CCF 100 1, CCF 100 2

These guidelines have been compiled to help the user obtain optimum performance and satisfaction from their selected product.

Preventative Maintenance Programme

A regular scheduled maintenance programme should be employed to prevent the build up of dirt and grease, which will detract from the overall appearance of the product.

Daily Cleaning

Brush down the profile using a soft bristled brush and remove dust particles from the profile by wiping with a damp cloth.

Twice Weekly or as Required

Wipe the surface with a micro fiber cloth or mop, using the cleaning chemical at the correct dilution. **Do not** soak the profile. Once the profile has been cleaned thoroughly rinse with fresh, clean water.

Recommended Cleaning Products for integrated cove and capping profile

Gradus has worked with Selden Research to undertake extensive testing on all Gradus skirting profiles. As a result, a range of cleaning products has been recommended for use with Gradus skirting profiles in a variety of environments.

The cleaning products listed below are suitable for this particular profile.

For further information about these cleaning products, including environmental suitability, instructions for use and COSHH data sheets, please contact:
