

# SureProtect Artworx®

## Bespoke Wall Cladding

---

Enhance your building interiors with SureProtect Artworx® to help you achieve a healthier, more aesthetically pleasing environment. From operating theatres, wayfinding and signage in corridors, welcoming reception areas, calming office environments to bold company logos, the design possibilities are endless.

### SPA25S - Sheet dimensions

- > Sheet sizes – 2440mm x 1220mm  
3048mm x 1220mm (max size)
- > Thickness – 2.5mm
- > Bespoke sizes also available

## Technical Information

---

### Information

- > Gradus can provide a bespoke cladding solution by digitally printing your design onto a durable sheet
- > Digital images can be applied to multiple sheets as a continuous image
- > Printed trims are available to create a seamless transition on large scale installations
- > A high quality, UV-cured, anti-glare protective hard coating helps to protect against everyday scuffs and scrapes
- > Reaction to fire classification EN 13501-1: Class B Fire/s3 Smoke  
See installation instructions for further information

### Recommended Adhesive - Gradus Grip

- > WGE1 1-part reactive adhesive (1kg / 650ml)
- > 10 year warranty
- > Solvent free
- > EC1 certified
- > Quick and easy to install via the use of a cordless caulk gun

### Printing Requirements

- > Accepted file formats: .ai, .psd, .jpg, .pdf & .eps files. If using a photographic image, the resolution of the file should be at least 600dpi at 1:10 scale. If using a vector image (typically digital drawings) these are made up of lines, so can be scaled to any size without distortion.
- > Provide details of finished trimmed size in mm (width x height)
- > Files must be provided in RGB or CMYK, Pantone colours should be specified
- > Photos or graphics supplied via "image libraries" must show copyright traceability and proof of purchase, always buy the largest choice of size

## About the Artist

Gradus has worked in collaboration with Kate Bond, a designer specialising in interior designs for healthcare environments using a biophilic philosophy. Together we have developed a one of a kind biophilic mural, inspired by the Peak District National Park. This piece of art showcases the unique way that SureProtect Artworx® can be used to develop inspiring and healing environments in healthcare settings.

Kate has a Distinction in her Masters in Fashion and Textiles at Bath Spa University, specialising in Surface Design. Since 2018 she has been commissioned for several public art projects including a series of murals for The RUH, Bath, Magnolia House, Yeovil, Severn Hospice, Shrewsbury, Telford, St Peter's Hospice, Bristol, and the new Y Bwthyn NGS Macmillan Specialist Palliative Care Unit in Wales.

### **About the Design**

With the heart and history of Gradus in or around Macclesfield, it made sense to centre the design around The Peak District. This location offered a rich and diverse variety of visual research for biophilic design.

The Peak District often featured in Kate's childhood with relatives living close by, so this beautiful part of the English countryside was familiar.

References for the work were captured at the best time of the year - during summer when The Peak District is flooded with gorgeous purple heathers, lush green ferns and a huge array of grasses. As you can see, these elements became the foundation of the final design.
