surface protection

The Oracle Shopping Centre - Reading

Providing a safe shopping and working environment for all is essential. This can be achieved by selecting materials that help to prevent accidents. Ideally these products should also reduce maintenance costs, whilst contributing to a sustainable environment.

- Gradus have over 40 years experience providing interior finishes to create safe and accessible environments for all
- Our products are manufactured and sourced in a responsible manner to minimise environmental impact
- Operating to ISO 9001 and ISO14001, Gradus offers Peace of Mind

safe link between floorcoverings

Legoland Discovery Centre - Trafford Centre

Entrance Matting

Slips, trips and falls account for over half of all reported injuries to the general public, with over 100,000 injuries in buildings accessed by the public every year (excluding domestic). Entrance matting can help to reduce the amount of tracked in dirt and moisture from outside by up to 90% which reduces the risk of slips on hard floors:

- Gradus offers a wide range of matting solutions to suit a range of internal and external requirements with coordinating walk off secondary matting
- A choice of framing and transition solutions to complement
- All Gradus Entrance Mats meet the guidance in Part M of the Building regulations and help to ensure an inclusive environment for all

Gradus entrance matting includes BREEAM "A" rated materials as well as products produced from up to 100% recycled aluminium and aircraft tyres

Stair Edgings

According to the Health & Safety Executive, one third of all reported fall accidents occur on stairs, with one serious injury every 5 minutes. Gradus XT stair edgings will significantly reduce the risk of accidents on stairs whilst helping to ensure that the environment meets the requirements of Part M of the building regulations by being accessible to all those wishing to use the building:

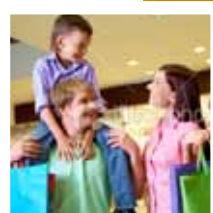

- Choice of profile size and shape to suit different types of step, floorcovering and traffic frequency
- Choice of insert types to suit areas subject to wetness e.g. walked in moisture
- Choice of colours to meet light reflectance requirements and guidance in BS8300:2009 ensuring a suitable colour contrast is visible at the step edge

XT range with extended insert design

Produced from different materials including up to 100% recycled aluminium

Wall Protection Systems

Damage to walls and corners is common in retail. Without attention they become unsightly and hazardous and repairs are expensive and disruptive to carry out. Gradus Wall Protection Systems minimise interior damage helping to keep on-going maintenance costs and disruption to a minimum:

- Gradus offers a wide choice of wall guards, floor rails, corner guards in a choice of materials including stainless steel, hard wearing PVC-u and rubber. PVC-u covers are replaceable ensuring any damage is easy to rectify
- Sanparrel PVC-u sheet is available to clad corridors and changing room areas. Through coloured, the material protects against scrapes and scuffs whilst being easy to clean and maintain

A large number of wall protection profiles are produced from 100% recycled aluminium and PVC-u materials

reduce ongoing maintenance

Transition Strips

Transition strip solutions help to prevent trip hazards that can result from using different types of floorcoverings which vary in height:

- Gradus offers a choice of profile types including replaceable tops and profiles that offer multiple height choices
- Solutions for medium and heavy traffic environments
- Choice of material types and finishes to suit all types of interior design

Selected products are produced from 100% recycled content

Floorcoverings

Different types of floorcoverings from tiles to broadloom carpet can be used together within a retail environment to create unique floor schemes and to differentiate areas within a store. Gradus floorcoverings can help by:

- Creating a smart, safe and comfortable environment for all users
- Being easy to clean and maintain, helping keep maintenance costs to a minimum
- Offering design flexibility as individual tiles can be removed and replaced as required

Contributing to a sustainable environment by offering BRE environmental performance ratings for use in retail
